

Seek&Track App for AppStore

Don't spend hours searching for the information which is important. Let Seek&Track find and deliver it to you!

Finding news and information has never been simpler than with Seek&Track! You are just one click away from making your life easier. Try Seek&Track now!

Seek&Track is a unique news and information searching and tracking utility, unlike anything you've ever experienced before. Created with an intuitive and simple user interface, it is supported by a powerful search engine, which searches, monitors and finds the information you need all over the Internet!

Our unique, efficient search engine enables users to search for information in news portals or web sites for any time period. You can also monitor any web sites in order to get notification when the information needed to appear there. Favorite shoes sales? New job position in a company you are dreaming to be a part of? Changes on stock markets where you are investing money? Be the first one to know about everything that is important to you!

It's as easy as 1-2-3-4!

1. Download the Seek&Track on your iPhone or iPad
2. Enter the word or phrase you are searching for
3. Choose the web site or search across all news portals in certain cities, countries or regions
4. If you need, you can choose to monitor the search term for you, and get notifications when it appears on your web site or in news channels.

Seek@Track is fast and powerful search engine across the Internet, which monitors and delivers all the information you need in a second!

Features:

- ‖ Simple, but powerful search engine, which allows users to search for concrete information across news sites or any other sites around the world
- ‖ Highly customizable apps, which allow you to set certain search terms and time periods in different regions and be able to monitor it
- ‖ Allows you to get push notification instantly after new information appears
- ‖ Convenient options to keep information organized and easily accessible
- ‖ The power to stay tapped into all the web sites and news channels you want at your fingertips
- ‖ The possibility to share all the information you've got via Facebook and Twitter
